Preliminary Notes: Applicant's Japanese foreign priority application of 12/8/99 has been received. The claim to foreign priority is accepted. Applicant's drawings filed December 8, 2000 are considered to be formal drawings.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Rangan ('073).

Claim 1: Rangan discloses a retrieval site connected to the Internet, as illustrated in FIG.

2. The retrieval site is supported by a retrieval server (31 described at col. 4, line 12) and a retrieval database (29 described at col. 4, line 14). The retrieval server is operative to fetch URL data from a plurality of information providing sites (23, 25, 27) and store the URL data for these sites in the retrieval database (29). The URL data retrieved represents details of services, such as banking and shopping (see server names of FIG. 2). At this point, a user at an information terminal (17) can input information (the address "Internet Portal.com" as shown in FIG. 2) and the server will transmit the page of Fig. 2 to the information terminal (17) from the server (31).

Claim 2: The retrieval server (31) fetches data retrieves information in the form of a listing of web sites (FIG. 2) The name of the site itself is indicative of the services associated with the site.

Art Unit: 2175

Claim 3: FIG. 2 illustrates the listing of websites (LBC.com, MyBank.com, etc.) which may be simultaneously searched by the user. Each one of the listed site names is also a hyperlink (col. 5, lines 43-44). The data in FIG. 2 is retrieved from the database 31 (col. 4, lines 19-23).

Claim 4: In the system of Rangan, the user has a pre-established profile (col. 6, lines 39-42). This profile consists of a listing of passwords and user names established by the user (34 in FIG. 2) which are used to access the listing of sites. This profile is retrieved and called upon whenever the user wants to access these sites.

Remarks

Applicants arguments have been considered.

Applicant argues that information retrieved from the database (29) by the server (31) of Rangan does not include data representing details of services. This argument is not correct. FIG. 2 illustrates web page data that is received at the database (29) and forwarded on the user at information terminal (17). The data includes a listing of websites. The names of the websites themselves are information indicative of services. For example, the website "MyBank.com" is information indicative of a banking service. The website "Airline.com" is information indicative of an airline service, etc.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2175

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (703) 306-5626.
